Owen, Richard
and the hippocampus minor 493
Oxidative phosphorylation 126
Oxygen toxicity 439, 530

P

P cells (mechanoreceptors) 285
p3 peptide 399, 404
Pacemaker activity 230, 241
Pain
  and bradykinin 99, 138 (L), 139 (L)
  inhibition of by 5-HT 349
  visceral 138 (L), 139 (L)
Paired helical filaments (PHFs) 460
Pallidal neurones 111
Parahippocampal gyrus, see entorhinal cortex
Parallel distributed processing (PDP) networks 283
Parkinson's disease
  in Africa 297
  and ageing 104
  and gene therapy 339
  and memantine 530
  and microglia 272
  and mitochondrial defects 125
  and oxidant stress 441
  transplantation 172, 339
Patch-clamp techniques 389
Patterning genes
  in development 316, 472
Pax genes 317, 382
PCR, see polymerase chain reaction
Peak-shift
  in discrimination learning 433
Penetrance, genetic 254, 387
Perceptron (artificial network) 283
Peripheral myelin protein 22 (PMP-22) 50
Peripheral neuropathies, hereditary 50
Perireticular nucleus (thalamus) 243
Pertussis toxin 224, 395 (L), 396 (L)
PET
  and energy metabolism 125
  and human neurotransplantation 172
  and musical skill 169
  and neural cell type identification 384
Phenylalkylamines
  and voltage-gated ion channels 502
Phonemic restoration
  and Adaptive Resonance Theory models 134
Phosphoinositide signalling 371
Phospholipase C 235, 371
Phosphorus metabolites
  and NMR 88
Phosphorylation
  channel 458
  and cytoskeleton dynamics 468
  receptor 147, 183
  of tau, and Alzheimer's disease 462
Photoreceptors 1, 371, 427
Pick's disease 332
Plasticity, see synaptic plasticity
Platelet-derived growth factor (PDGF) 76
Polyamines 153
Polyenoic fatty acids 297
Polymerase chain reaction (PCR) 11, 34, 301
Polysomes 515
Pontine nucleus 446, 449, 450
Pore, transmembrane
  of voltage-gated ion channels 501
Positron emission tomography, see PET
Post-inhibitory rebound
  and rhythmicity 228
Postsynaptic organization
  and agrin 73
  and ocular dominance plasticity 118
  and synaptic plasticity 142, 480, 524
Post-tetanic potentiation (PTP) 522
Potassium (K^+) channels
  and polyamines 156
  and presynaptic activity 43, 224
  structure and function 500
  and visual–vestibular associations in invertebrates 428
Precursors, neural 510
Pre-protachykinin 420
Pressure-clamp technique 341
Presynaptic mechanisms
  in synaptic plasticity 118, 143, 524
  in synaptic transmission 43, 222, 395 (L), 396 (L)
Presynaptic receptors 222
Priming
  and Adaptive Resonance Theory models 134
Prion protein 425
Probe labelling
  and *in situ* hybridization 10
Proctolin 390
Progenitor cells 96 (L), 340
Proliferation, cell
  regulation by neurotransmitters 235
Prosencephalon (forebrain) 472
Prosomeres (forebrain development) 475
Protein analysis
  by consensus sequence procedure 77
Protein kinases
  and amyloid β protein 406
  and glutamate transporters 368
  in long-term synaptic modification 148, 523
  and phototransduction 376
  and presynaptic inhibition 224
  and receptor desensitization 183
  and spinule formation 201
  and tau phosphorylation 462
Proteolipid protein 54
Psychiatry 247 (BR)
Psychology
  of signal–receiver evolution 431
Purkinje cells 27, 67, 150, 177 (L)
Pyramidal cells (hippocampus) 59, 141, 219

Q

Quail–chick chimaeras 64
Quantal analysis 141

R

Radioactive procedures
  and *in situ* hybridization 9
Random dot kinematograms 264
Raphé neurones 236, 346
Rapid eye movement (REM) sleep 347
Ravel, Maurice
  and musical dysfunction 170
Receiver psychology
  and animal signalling 430
Receptors, see acetylcholine, adenosine, adrenergic, agrin, AMPA, androgen, bradykinin, dopamine, glutamate, glycine, 5-HT, kainate, mechanoreceptors, NMDA, non-NMDA, opioid, presynaptic and ryanodine receptors
Reciprocal inhibition
  and rhythmicity 228
Recognition learning
  and Adaptive Resonance Theory models 131
  in animal communication 434
Recombinant viruses 251
Red nucleus 27, 446, 449
Redox modulatory site
  of NMDA receptors 530
Reflex, bending (in leech) 283
Regulatory genes
  and embryonic patterning 316, 472
Relaxation kinetics
  measurement of in mechanosensitive channels 341
REM sleep, see rapid eye movement sleep
Reporter enzymes 14, 251, 339
Repulsive guidance molecule 2
Restriction fragment length polymorphism, see RFLP
Retina
  embryonic 96 (L)
  and gap junctions 191
  synaptic plasticity of 201
Retinal ganglion cells 2
Reversal learning
  and amygdala lesions 329
  in olfaction 17, 21, 22, 24, 25, 262 (L)
RFLP markers 83
Rhinal cortex 329
Rhombomeres 318
Rhythmicity
  and fusimotor discharge patterns 273
  and non-inactivating Na^+ currents 458
  swimming 228
  in thalamic reticular nucleus 240
Ribonucleoprotein complex 516
RNA editing 362
Roof midline 477
Roof plate 322
Rough endoplasmic reticulum 515
Rubrocerebellar loops 28
Ryanodine receptor (Ca^{2+} release channel) 374

S

S100β (calcium-binding protein) 238
Saccadic gaze shifts 214 (L), 216 (L)
Scavengers
  of free radicals 439
Schizophrenia 258, 333, 387, 488 (BR)
Schwann cells 50
Scrapie 425
Second messengers
  and gap junctions 191
  in growth cone collapse 165
  in growth regulatory signals 233
  in olfaction 5
  in phototransduction 371
  in synaptic plasticity 120, 150
  in taste perception 194
Secretases 399, 403, 410
Secretion
  and cytoskeleton dynamics 466
Secretory vesicles 466
Segmentation
  in visual processing 264
Seizures, see epilepsy
Sensory neurones
  death of 354
  and environmental stimuli 533 (BR)
  excitation and sensitization 100
  and fusimotor system 273
  heterogeneity of 355
  inhibition by 5-HT 346
  in leech 285
  and NGF 353
  olfactory 5

and somatostatin receptors 38
Sexual imprinting 433
'Sherman paradox' 254
'Short-term exploratory modulation' (STEM)
and synaptic plasticity 163
Short-term memory 132
Short-term potentiation (STP) 522
Sight-reading
neurobiological bases of 169
Signal design
in animal communication 430
Signal recognition particle (translation) 516
Signalling systems
and agrin 75
in animal communication 430
in cell differentiation 1
and gap junctions 186
in growth regulation 233
in mRNA transport 518
in olfaction 5
in taste 192
in vision 203, 371
Skin afferents 354
Sleep 347
Smoothing
in visual processing 266
Sodium (Na^+) channels 455, 500
Sodium (Na^+) currents 303, 455
Sodium (Na^+)-dependent transporters
365, 415
Somatostatin receptors
molecular biology 34
and opioid receptors 509
pharmacology 36
structure 35
tissue distribution 35
Spatial learning 148
Spectral classes
of cone horizontal cells 203
Spina bifida 382
Spinal and bulbar muscular atrophy 255
Spinules 201
Spiny stellate cells (entorhinal cortex) 60
Splicing, alternative
agrin 74, 76
AMPA receptors 361
tau protein 461
Spongiform encephalopathy 425
'Stability-plasticity dilemma'
in learning and memory 131
Statocysts 427
Stem cells, embryonic 340, 510
Steroids 184
Stomatogastric nervous system
198 (BR), 389
Straight filaments 460
Stretch 276, 345
Striatal neurones 111, 172
Striatopallidonigral system 112, 300
Striatum 111
Stroke 93, 226, 531
Subplate, cortical 244, 310
Substance P 299, 419
Substantia nigra
111, 299, 308 (L), 309 (L), 441
Subthalamic nucleus 111
Sulci, ventricular 473, 495
Superior colliculus
179 (L), 180 (L), 214 (L), 216 (L)
Supernormal signals
in animal communication 433
Superoxide dismutase (SOD) 439
Superoxide radical (O_2^-) 439
Swedish familial Alzheimer's disease
kindred 399, 406
Swimming 227
Sympathetic ganglia 419
Sympathomimetic amines 415
Synapses
artificial 393
long-term modification of (see also
LTD and LTP) 480
molecular analysis of 43, 466
Synapsins 466
Synaptic anatomy 141, 201
Synaptic cleft
glutamatergic 366
Synaptic modification
and models of LTP and LTD 480
Synaptic plasticity
and APP_s 409
crucial factors in 120
hippocampal 141
and learning 131, 141, 163
and neurotransmitters 419
NMDA-receptor-dependent 521
and receptor phosphorylation 147
retinal 201
rules 486
threshold for 525
visual cortical 116
see also LTD, LTP and STP
Synaptogenesis 72, 76, 278

T

Tangle fragments, see paired helical
filaments
Target recognition 280, 310, 519
Taste 192
Taste receptors (catfish) 192
Tau protein 460
Taurine
and ^1H NMR 384
Tectoreticulospinal neurones
and gaze shifts 214 (L), 216 (L)
Telencencephalon 472
Temporal lobe epileptogenesis 63
Tetraethylammonium (TEA) ions
and voltage-gated ion channels 502
Tetrodotoxin 501
Thalamic reticular nucleus 240
Thalamocortical pathways 240, 310
Thalamus 240, 311
Thought
and cerebellum 448
Tolerance
to opioids 509
and NMDA antagonists 527
Toxins
in animal signalling 432
see also neurotoxins
Transcription factors
and axonal guidance 316
in embryonic muscle fibres 282
and neuronal differentiation 1
and neuropsychiatric disorders 258
Transfer phenomena
in discrimination learning 18, 22, 25
Transferrin 439
Transforming growth factor β (TGF-β) 76
Translation
of mRNA 515
Transplantation
using embryo chimaeras 70
and gene therapy 339
general 41 (BB)
and neuroblast determination 513
and PET 172
Transport, active
of mRNA 518
Transporters 365, 415
Trinucleotide repeats, DNA 254
trp phototransduction mutant 371
Trypanosomiasis (African sleeping sickness)
298
Tubulin 165, 462
Tumour necrosis factor-α 419
Tyrosine hydroxylase 107, 339
Tyrosine kinases 1, 440

V

Vagal nerves
and taste perception 192
Vasculature 108, 206, 337 (BR)
Vasoactive intestinal polypeptide (VIP) 208
Vasodilation, cerebral 206
Velocity field 263
Vestibular system 199 (BR), 427
Vestibulo–ocular reflex 448
Vigilance
and Adaptive Resonance Theory models
134
VIP, see vasoactive intestinal polypeptide
Viruses, recombinant 251, 339
Visceral pain 138 (L), 139 (L)
Vision 203, 371, 379 (BR)
Visual cortex 116, 314, 329
Visual motion processing 263, 450
Visual–vestibular association 427
Vitamins
and neural tube defects 382
Voltage-gated channels, see calcium (Ca^{2+}),
potassium (K^+) and sodium (Na^+)
channels
Voltage sensors (in channels) 500

W

Waking
and 5-HT neuronal activity 346
Wallerian degeneration 269
Wernicke's aphasia 170
Win–stay, lose–shift strategies
and amygdala 329
in olfactory learning 17, 21, 22, 262 (L)
Wnt genes 317, 472

X

X chromosome, neuropathology 254, 387
Xenopus 227, 342

Z

Zona limitans 474

Back Issues of Elsevier Trends Journals

Back issues from 1992 and 1993 are available to our customers at the following rates. Please state which issue(s) you require, including the volume and number (or year and month).

Issues(s): _____

_____

_____

Please tick how many issues you would like below. Issues are available in bulks at discounted rates – institutions/libraries must pay institutional rates.

Individual Rates

- ❑ Single issue £16.00/$25.00 each
- ❑ Five issues £68.00/$106.00 (includes 15% discount)
- ❑ Ten issues £120.00/$187.00 (includes 25% discount)

Institutional Rates

- ❑ Single issues £33.00/$52.00 each
- ❑ Five issues £140.00/$218.00 (includes 15% discount)
- ❑ Ten issues £248.00/$387.00 (includes 25% discount)

PAYMENT METHOD:

- ❑ Personal cheque, Eurocheque, or money order made payable to **Elsevier**
- ❑ Credit card
  - ❑ Visa/Barclaycard ❑ Mastercard/Access ❑ American Express

  Card no: _____

  Expiry date: _____

  Name on card: _____ Signature: _____
